PCR and ELISA tests for the diagnosis
of infectious human and veterinary
diseases

INNOVATIVE DIAGNOSTICS

As an actor for *One Health*, we offer diagnostic tests to detect zoonotic diseases in humans and animals, and veterinary diseases in farm animals, thereby contributing to the protection of human health and the global food supply.

MOLECULAR BIOLOGY

We offer a complete solution for molecular diagnostics from sample pre-treatment to final results. Our range for molecular biology includes extraction robots, nucleic acid purification kits using spin columns or magnetic beads, and ready-to-use amplification kits.

SEROLOGY

Our immunodiagnostic kits include all the necessary reagents for the analysis of serum, plasma, meat juice or milk samples. Tests are standardized to detect national and international reference sera, and show innovation through simplified test protocols, ready-to-use reagents, and improved test performance.

The veterinary range of Innovative Diagnostics

Our veterinary range for the control of infectious diseases in farm animals is marketed under the brand name iDvet.

With you at every step
